INPUT
Member health profile
Height and weight (BMI), fitness goal, experience level, joint or bone conditions and severity, daily status
Check-in credentials
Personal dynamic QR code, or 3-digit PIN, phone number or name at the check-in terminal
Payments
₱50 daily walk-in fee (₱40 senior) and subscription payments in cash or GCash
Subscription details
Membership plans and rates: daily, half-month and monthly; student discount
Equipment status reports
Broken or unsafe equipment flagged by members
PROCESS
C4.5 Decision Tree recommendation engine
Processes the health profile, goal and real-time equipment availability to classify a safe workout program; members with severe limitations receive a modified routine
Attendance verification
Verifies the dynamic QR or terminal check-in; tracks the 12-hour walk-in pass and re-entry window; works offline with the last synced data
Subscription and payment recording
Records subscriptions and payments, confirmed by staff and the owner, and checks expiration dates
Two-tier equipment status
Reported equipment is marked “Pending Review”; staff set “Out of Order”, which excludes it from recommendations
High-risk detection
Detects members whose physical limitations need one-on-one supervision and alerts the on-call instructor
OUTPUT
Gym Members
Tailored workout recommendations, check-in confirmations, subscription expiration reminders, digital receipts
Gym Instructors
High-risk alerts with health constraint summaries for one-on-one coaching; reviewed and adjusted routines
Front-Desk Staff
12-hour temporary QR passes for walk-in clients, attendance logs, equipment status updates
Gym Owner / Admin
Administrative dashboard of membership status, attendance and payment records; printable reports
FEEDBACK — updated health profiles, equipment status reports and the on-call instructor’s corrections
